## OPERATIONS \& ALGEBRAIC THINKING

Essential Standard: Represents and solves problems involving multiplication

## ESSENTIAL KNOWLEDGE OUTCOME:

Students possess an understanding of multiplication and division through modeling and manipulation of objects and apply these skills to solve problems.

## STANDARDS ADDRESSED:

3.OA. 1 Interpret products of whole numbers, e.g., interpret $5 \times 7$ as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as $5 \times 7$.
3.OA. 3 Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem. ${ }^{1}$

| First Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to interpret products of whole numbers to <br> solve word problems in situations involving equal <br> groups and arrays. |
| Needs Improvement <br> $(2)$ | Requires teacher prompting and support to interpret <br> products of whole numbers and solve word <br> problems in situations involving equal groups and <br> arrays. |
| Proficient (3) | Independently interprets products of whole <br> numbers e.g., interpret 5 $\times 7$ as the total number <br> of objects in 5 groups of 7 objects each. Solve <br> word problems in situations involving equal groups <br> and arrays and measurement quantities. |
| Advanced (4) | Selects multiple strategies to create and solve <br> multiplication word problems and are able to justify <br> strategies. |

[^0]Revised June 2014

## OPERATIONS \& ALGEBRAIC THINKING

Essential Standard: Represents and solves problems involving division

## STANDARDS ADDRESSED:

3.OA. 2 Interprets whole number quotients of whole numbers, e.g. interprets $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each
3.OA. 3 Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem. ${ }^{2}$

| First Trimester: Benchmarks |  |
| :---: | :---: |
|  | Not assessed in this trimester. |
| Second Trimester: Benchmarks |  |
| Warning (1) | Unable to interpret whole number quotients of whole numbers using related multiplication facts. |
| Needs Improvement (2) | Requires teacher prompting and support to interpret whole number quotients using related multiplication facts. Needs teacher assistance to solve word problems in situations involving equal groups. |
| Proficient (3) | Independently interprets whole number quotients using related multiplication facts e.g., interprets $15 \div 5$ as the number of objects in each share when 15 objects are partitioned equally into 5 shares, or as a number of shares when 15 objects are partitioned into equal shares of 5 objects each. Solve word problems in situations involving equal groups. Independently determines the |
| Advanced (4) | Selects multiple strategies to create and solve division word problems using related multiplication facts and are able to justify their strategy. |

Third Trimester: Benchmarks- Not Assessed

[^1]
## OPERATIONS \& ALGEBRAEIC THINKING

Essential Standard: Understands properties of multiplication and the relationship between multiplication and division

## STANDARDS ADDRESSED:

3.OA. 5 Apply properties of operations as strategies to multiply and divide. Examples: If $6 \times 4=24$ is known, then $4 \times 6=24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5=15$ then $15 \times 2=30$, or by $5 \times 2=10$ then $3 \times 10=30$. (Associative property of multiplication.) Knowing that $8 \times 5=40$ and $8 \times 2=16$, one can find $8 \times 7$ as $8 x(5+2)=(8 \times 5)+(8 \times 2)=40+16=56$. (Distributive property.)

| First Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to apply properties of operations as strategies <br> to multiply all multiples through 100. |
| Needs Improvement <br> (2) | Requires teacher prompting and support to apply <br> properties of operations as strategies to multiply. Uses <br> tactile aids or arrays to multiply all multiples through <br> 100. |
| Proficient (3) | Independently applies the properties of operations as <br> strategies of multiplication. Uses the Commutative, <br> Associative and Distributive properties of multiplication <br> to solve problems. |
| Advanced (4) | Uses the Properties of Multiplication as a strategy to <br> solve problems and justify their strategy. |

| Second Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to apply properties of operations as strategies <br> to multiply all multiples through 100. |
| Needs Improvement <br> (2) | Requires teacher prompting and support to apply <br> properties of operations as strategies to multiply. Uses <br> tactile aids or arrays to multiply all multiples through <br> 100. |
| Proficient (3) | Independently applies the properties of operations as <br> strategies of multiplication. Uses the Commutative, <br> Associative and Distributive properties of multiplication |

|  | to solve problems. |
| :--- | :--- |
| Advanced (4) | Uses the Properties of Multiplication as a strategy to <br> solve problems and justify their strategy. |

## Third Trimester: Benchmarks

Not assessed in this trimester.

## OPERATIONS \& ALGEBRAEIC THINKING

Essential Standard: Understands division as an unknown factor problem

## STANDARDS ADDRESSED:

3.OA.6 Understand division as an unknown-factor problem. For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8 .

## First Trimester: Benchmarks- Not Assessed

| Second Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to understand division as an unknown factor <br> problem. |
| Needs Improvement <br> $(2)$ | Requires teacher prompting and support to understand <br> division as an unknown factor problem. |
| Proficient (3) | Independently understands division as an unknown <br> factor problem . |
| Advanced (4) | Independently understands division as an unknown <br> factor problem. Justifies and communicates reasoning. |

| Third Trimester: Benchmarks |  |
| :--- | :--- |
|  | Not assessed in this trimester. |

## OPERATIONS \& ALGEBRAEIC THINKING

Essential Standard: Fluently multiplies within 100

## STANDARDS ADDRESSED

3.OA.7 Fluently multiply and divide within 100 , using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5=40$, one knows $40 \div 5=8$ ) or properties of operations. By the end of grade 3 , know from memory all products of two one-digit numbers.

First Trimester: Benchmarks- Not Assessed

## Second Trimester: Benchmarks- Not Assessed

| Third Trimester: |  |
| :--- | :--- |
| Benchmarks |  |
| Needs <br> Improvement <br> $(2)$ | Requires teacher prompting and support, as well as tactile <br> aids to recall multiplication facts in a timely manner. |
| Proficient (3) | Independently able to recall basic multiplication facts <br> (within 100) from memory, in a timely manner. |
| Advanced (4) |  |

## OPERATIONS \& ALGEBRAEIC THINKING

## Essential Standard: Fluently divides within 100

## STANDARDS ADDRESSED

3.OA. 7 Fluently multiply and divide within 100 , using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5=40$, one knows $40 \div 5=8$ ) or properties of operations. By the end of grade 3, know from memory all products of two one-digit numbers.

## First Trimester: Benchmarks

Not assessed in this trimester.

Second Trimester: Benchmarks- Not Assessed

| Third Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to recall division facts in a timely manner. |
| Needs Improvement (2) | Requires teacher prompting and support, as well as <br> tactile aids to recall division facts in a timely manner. |
| Proficient (3) | Independently able to recall basic division facts <br> (within 100) from memory, in a timely manner. |
| Advanced (4) |  |

## OPERATIONS \& ALGEBRAEIC THINKING

Essential Standard: Constructs and solves problems with variables
( $3 x \square=6$ ) $(5=? \div 3)$

## STANDARDS ADDRESSED:

3.OA. 4 Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 x ?=48,5=\square \div 3,6 \times 6=$ ?.

| First Trimester: | Benchmarks |
| :--- | :--- |
| Warning (1) | Unable to determine the unknown whole number in a <br> multiplication equation relating three whole numbers. <br> For example, determine the unknown number that <br> makes the equation true in each of the equations <br> $8 \times$ ? $=48,6 \times 6=?$. |
| Needs <br> Improvement <br> (2) | Requires teacher prompting and support to determine the <br> unknown whole number in a multiplication equation <br> relating three whole numbers. For example, determine <br> the unknown number that makes the equation true in <br> each of the equations 8x ? $=48,6 \times 6=?$. |
| Proficient (3) | Determine the unknown whole number in a <br> multiplication equation relating three whole numbers. <br> For example, determine the unknown number that |

|  | makes the equation true in each of the equations 8 x <br> $?=48,6 \times 6=?$. |
| :--- | :--- |
| Advanced (4) |  |

| Second Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to Determine the unknown whole number in a <br> division equation relating three whole numbers. For <br> example, determine the unknown number that makes <br> the equation true in the equation $5=\_\div 3$. |
| Needs <br> Improvement (2) | Requires teacher prompting and support to Determine the <br> unknown whole number in a division equation relating <br> three whole numbers. For example, determine the <br> unknown number that makes the equation true in the <br> equation 5=_ $\div 3$. |
| Proficient (3) | Determine the unknown whole number in a division <br> equation relating three whole numbers. For example, <br> determine the unknown number that makes the <br> equation true in the equation $5=\_\div 3$. |
| Advanced (4) |  |

Third Trimester: Benchmarks
Not assessed in this trimester.

## OPERATIONS \& ALGEBRAEIC THINKING

## Essential Standard: Solves word problems involving the four operations

## ( + , -, x. $\div$ )

## STANDARDS ADDRESSED:

3.OA. 8 Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.

First Trimester: Benchmarks
Not assessed in this trimester

| Second Trimester: Benchmarks |  |
| :--- | :--- |

| Proficient (3) | Independently solves two-step word problems using <br> the four operations. Represent these problems <br> using equations with a letter standing for the <br> unknown quantity. Assesses the reasonableness <br> of answers using mental computation and <br> estimation strategies including rounding. |

|  | Independently solves multi-step word problems using <br> the four operations. Independently represents these <br> problems using equations with a letter standing for the <br> unknown quantity. Uses multiple strategies to assess <br> the reasonableness of answers using mental <br> computation and multiple estimation strategies. |
| :--- | :--- |

## OPERATIONS \& ALGEBRAEIC THINKING

Essential Standard: Identifies and explains mathematical patterns

## STANDARDS ADDRESSED:

3.OA. 9 Identify arithmetic patterns (including patterns in the addition table or multiplication table) and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.

| First Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to identify patterns in the addition or multiplication <br> table and explain them using properties of operations. |
| Needs <br> Improvement <br> $(2)$ | Requires teacher prompting and support to identifiy patterns <br> in the addition and multiplication table and explain them <br> using properties of operations. |
| Proficient (3) | Independently identifies patterns in the addition and <br> multiplication table and explain them using properties of <br> operations. |
| Advanced (4) | Independently extends multiplication and division patterns <br> and applies them to solve word problems. Explains reasoning <br> through a table or chart, and is able to construct viable <br> arguments to justify and communicate reasoning. |

Second Trimester: Benchmarks- Not Assessed
Third Trimester: Benchmarks- Not Assessed

## Essential Standard: Rounds numbers to the nearest 10, 100

## ESSENTIAL KNOWLEDGE OUTCOME:

Students will understand and explain what numbers mean, how they may be represented, and what relationships exist among them to accurately and efficiently perform computations.

## STANDARDS ADDRESSED:

3.NBT. 1 Use place value understanding to round whole numbers to the nearest 10 or 100 .

| First Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to round whole numbers to the nearest ten and <br> hundred. |
| Needs <br> Improvement <br> $(2)$ | Requires teacher prompting and support to round whole <br> numbers to the nearest ten and hundred. |
| Proficient (3) | Independently uses place value understanding to round <br> whole numbers to the nearest ten and hundred. <br> Independently uses rounding to estimate and determines if <br> an estimate is reasonable. |
| Advanced (4) | Independently uses place-value understanding to assess the <br> reasonableness of answers in word problems using <br> estimation strategies including rounding, and is able to <br> construct viable arguments to explain answers and critique <br> the reasoning of others. |

| Second Trimester: | Benchmarks |

Not assessed in this trimester.

## Third Trimester: Benchmarks

Not assessed in this trimester.

Grade 3 Math Scoring Rubric

## NUMBER \& OPERATIONS - FRACTIONS

Essential Standard: Develops an understanding of fractions as numbers

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand what fractions mean, how they may be represented and what relationships exist among them.

## STANDARDS ADDRESSED:

3.NF. 1 Understand a fraction $\mathbf{1 / b}$ as the quantity formed by 1 part when a whole is partitioned into $\mathbf{b}$ equal parts; understand a fraction $\mathbf{a} / \mathbf{b}$ as the quantity formed by $\mathbf{a}$ parts of size $\mathbf{1 / b}$

| First Trimester: Benchmarks |  |
| :--- | :--- |
|  | Not assessed in this trimester |

| Second Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to understand a fraction as the quantity <br> formed by 1 part when a whole is partitioned into <br> equal parts. |
| Needs Improvement (2) | Requires teacher prompting and support to <br> understand a fraction as the quantity formed by 1 <br> part when a whole is partitioned into equal parts. |
| Proficient (3) | Independently understands a fraction as the quantity <br> formed by 1 part when a whole is partitioned into <br> equal parts. |
| Advanced (4) | . |

Third Trimester: Benchmarks- Not Assessed

## NUMBER \& OPERATIONS - FRACTIONS

Essential Standard: Understands equivalence of fractions and compares fractions by reasoning about their size
*visual models may include: fraction bars or circles, Cuisenaire rods, dot or grid paper, Geoboards, length or measurement models, area models.

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand what fractions mean, how they may be represented and what relationships exist among them.

## STANDARDS ADDRESSED:

3.NF. 3 Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.

1. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.
2. Recognize and generate simple equivalent fractions, e.g., $1 / \mathbf{2}=\mathbf{2 / 4}$, $\mathbf{4 / 6}=\mathbf{2 / 3}$. Explain why the fractions are equivalent, e.g., by using a visual fraction model.
3. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. (e.g. Express 3 in the form 3/1; recognize that $6 / 1=6$; locate $4 / 4$ and 1 at the same point of a number line diagram.)
4. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols $>,=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.

## First Trimester: Benchmarks

Not assessed in this trimester

Second Trimester: Benchmarks- Not Assessed

## Third Trimester: Benchmarks

Warning (1) $\quad$| Unable to compare fractions with the same |
| :--- |
| numerator or denominator to determine their |
| equivalence, record the comparisons using $<,=$, or $>$ |
| symbols, and justify the relationships by using visual |
| models. |

Revised June 2014

| Needs Improvement (2) | Requires teacher prompting and support to compare <br> fractions with the same numerator or denominator to <br> determine their equivalence, record the compariosons <br> using $<,=$, or $>$ symbols, and justify the relationships <br> by using visual models. |
| :--- | :--- |
| Proficient (3) | Compares fractions with the same numerator or <br> denominator to determine their equivalence, record <br> the comparisons using $<,=$, or $>$ symbols, and justify <br> the relationships by using visual models. |
| Advanced (4) | Applies knowledge of fractions with the same <br> numerator or denominator to determine their <br> equivalence, record the comparisons using $<,=$, or $>$ <br> symbols, solve problems and justify the relationships <br> by using visual models. |

Requires teacher prompting and support to compare determine their equivalence, record the comparisons using $<$, $=$, or $>$ symbols, and justify the relationships by using visual models.

Cons the comparisons using $<,=$ the relationships by using visual models.
Applies knowledge of fractions with the same equivalence, record the comparisons using $<,=$, or $>$ by using visual models.

## NUMBER \& OPERATIONS - FRACTIONS

Essential Standard: Understands and represents fractions as numbers on a number line
*visual models may include: fraction bars or circles, Cuisenaire rods, dot or grid paper, Geoboards, length or measurement models, area models.

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand what fractions mean, how they may be represented and what relationships exist among them.

## STANDARDS ADDRESSED:

3.NF. 2 Understand a fraction as a number on the number line; represent fractions on a number line diagram.
A.Represent a fraction $\mathbf{1 / b}$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into $\mathbf{b}$ equal parts. Recognize that each part has size $\mathbf{1 / b}$ and that the endpoint of the part based at $\mathbf{0}$ locates the number $\mathbf{1} / \mathbf{b}$ on the number line.
B. Represent a fraction $\mathbf{a} / \mathbf{b}$ on a number line diagram by marking off a lengths $\mathbf{1 / b}$ from 0 . Recognize that the resulting interval has size $\mathbf{a} / \mathbf{b}$ and that its endpoint locates the number $\mathbf{a} / \mathbf{b}$ on the number line.

| Second Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to Independently represents fractions on a <br> number line diagram by marking off equidistant <br> intervals of $\mathbf{1 / b}$ starting at "0" to its endpoint locating <br> the fraction $\mathbf{a} / \mathbf{b}$. |
| Needs Improvement <br> $(2)$ | Requires teacher prompting and support to represent <br> fractions on a number line diagram by marking off <br> equidistant intervals of $\mathbf{1 / b}$ starting at "0" to its <br> endpoint locating the fraction $\mathbf{a / b}$. |
| Proficient (3) | Independently represents fractions on a number line <br> diagram by marking off equidistant intervals of $\mathbf{1 / b}$ <br> starting at "0" to its endpoint locating the fraction a/b. |
| Advanced (4) | Apply and extend the understanding of a fraction as a <br> number on the number line diagram beyond the whole <br> number $\mathbf{1}$ or $\mathbf{b} / \mathbf{b}$. |

## MEASUREMENT \& DATA

Essential Standard: Tells time to the minute a.m./p.m.

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand how to collect, represent, analyze, and interpret data gathered using a variety of tools and techniques.

## STANDARDS ADDRESSED:

3.MD. 1 Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.

| Warning (1) | Unable to measure and estimate liquid volumes and masses <br> of objects. Unable to solve one-step word problems involving <br> masses or volumes that are given in the same units. |
| Needs |  |
| Improvement |  |
| (2) | Requires teacher prompting and support to measure and <br> estimate liquid volumes and masses of objects using <br> standard units. Requires teacher support and guidance to <br> solve one-step word problems involving masses or volumes <br> that are given in the same units. |
| Proficient (3) | Independently measures and estimates liquid volumes and <br> masses of objects using standard units of grams, kilograms, <br> and liters. Independently adds, subtracts, multiplies, or <br> divides to solve one-step word problems involving masses or <br> volumes that are given in the same units. |
| Advanced (4) | Selects multiple strategies to create and solve word <br> problems involving liquid volumes and masses, and justifies <br> the strategy. |

MEASUREMENT \& DATA
Essential Standard: Measures length

## STANDARDS ADDRESSED:

3.MD. 4 Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units-whole numbers, halves, or quarters.

| First Trimester: Benchmarks |  |
| :--- | :--- |
|  | Not assessed in this trimester |

Second Trimester: Benchmarks
using rulers marked with halves and fourths of an inch
Warning (1) Unable to display the data on a line plot, where the horizontal scale is marked off in appropriate units- whole numbers, halves, or quarters.
Requires teacher prompting and support to generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Requires support to show the data when making a line plot, where the horizontal scale is marked off in appropriate units-whole numbers, halves, or quarters.
Independently generates measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Shows the data by making a line plot, where the horizontal scale is marked off in appropriate units-whole numbers, halves, or quarters.
Independently generates measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Shows the data by making a line plot, where the horizontal scale is marked off in appropriate units-whole numbers, halves, or quarters. Student analyzes and interprets data to make valid comparisons within graphed data.
Third Trimester: Benchmarks

Not assessed in this trimester

## Essential Standard: Understands concepts of area

## STANDARDS ADDRESSED:

3.MD. 5 Recognize area as an attribute of plane figures and understand concepts of area measurement.
a. A square with side length 1 unit, called "a unit square," is said
to have "one square unit" of area, and can be used to measure area.
b. A plane figure which can be covered without gaps or overlaps by $n$ unit squares is said to have an area of $n$ square units
3.MD. 6 Measure areas by counting unit squares (square cm , square m , square in, square ft, and improvised units).
3.MD. 7 Relate area to the operations of multiplication and addition.
a. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.
b. Multiply side lengths to find areas of rectangles with wholenumber side lengths in the context of solving real-world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.
c. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths $a$ and $b+c$ is the sum of $a \times b$ and $a \times c$. Use area models to represent the distributive property in mathematical reasoning.
d. Recognize area as additive. Find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real-world problems.

## First Trimester: Benchmarks

Not assessed in this trimester.

## Second Trimester: Benchmarks

Not assessed in this trimester.

Third Trimester: Benchmarks
Unable to recognize area as an attribute of plane figures and understand concepts of area measurement, measure area by counting unit squares, and relate area to the operations of multiplication and addition.
Requires teacher support and guidance to recognize area as an attribute of plane figures and understand concepts of area measurement, measure area by counting unit squares, and relate area to the operations of multiplication and addition.
Independently recognizes area as an attribute of plane figures and understand concepts of area measurement, measures area by counting unit squares, and relates area to the operations of multiplication and addition.
Recognizes area as an attribute of plane figures and understand concepts of area measurement, measures area by counting unit squares, and selects multiple strategies to relate area to the operations of multiplication and addition.

Grade 3 Math Scoring Rubric

MEASUREMENT \& DATA

## Essential Standard: Recognizes and finds perimeter

## STANDARDS ADDRESSED:

3.MD. 8 Solve real-world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.

## First Trimester: Benchmarks <br> Not assessed in this trimester

| :--- | :--- |
|  | Not assessed in this trimester. |

| Third Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to solve real world and mathematical problems <br> involving perimeters with polygons, including a given side <br> length and an unknown side length. Shows rectangles with <br> the same perimeter and different areas or with the same <br> areas and different perimeters |
| Needs | Requires teacher prompting and support to solve real world <br> and mathematical problems involving perimeters with <br> polygons, including a given side length and an unknown side <br> length. Shows rectangles with the same perimeter and <br> different areas or with the same areas and different <br> perimeters |
| Proficient (3) | Independently able to solve real world and mathematical <br> problems involving perimeters with polygons, including a <br> given side length and an unknown side length. Shows <br> rectangles with the same perimeter and different areas or <br> with the same areas and different perimeters |
| Advanced (4) | Independently able to create rectangles with the same <br> perimeter and different areas or with the same areas and <br> different perimeters. Able to organize all the possibilities into <br> an organized list. |

Revised June 2014

## GEOMETRY

Essential Standard: Recognizes, compares, and categorizes shapes by attributes

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand, explain, and apply the properties and relationships among and between geometric figures to appreciate the importance of geometry in our world.

## STANDARDS ADDRESSED:

3.G.1 Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.

Second Trimester: Benchmarks
Not assessed in this trimester

| Third Trimester: Benchmarks |  |
| :--- | :--- |
| Warning (1) | Unable to understand that shapes in different <br> categories may share attributes, and that the <br> shared attributes can define a larger category. <br> Unable to recognize rhombuses, rectangles, and <br> squares as examples of quadrilaterals. |
| Needs Improvement (2) | Requires teacher prompting and support to <br> understand that shapes in different categories <br> may share attributes, and that the shared <br> attributes can define a larger category. Needs <br> prompting to recognize rhombuses, rectangles, <br> and squares as examples of quadrilaterals. |
| Proficient (3) | Independently understands that shapes in <br> different categories may share attributes, and <br> that the shared attributes can define a larger <br> category. Recognizes rhombuses, rectangles, and <br> squares as examples of quadrilaterals, and draws <br> examples of quadrilaterals that do not belong to <br> any of these subcategories. |
| Advanced (4) | Independently understands that shapes in <br> different categories may share attributes, and <br> that the shared attributes can define a larger <br> category. Recognizes rhombuses, rectangles, and <br> squares as examples of quadrilaterals, and draws <br> examples of quadrilaterals that do not belong to <br> any of these subcategories. Independently able to <br> construct viable arguments to explain answers and <br> critique the reasoning of others. |

## Essential Standard: Partitions shapes into parts with equal areas

## ESSENTIAL KNOWLEDGE OUTCOME:

Students understand, explain, and apply the properties and relationships among and between geometric figures to appreciate the importance of geometry in our world.

## STANDARDS ADDRESSED:

3.G. 2 Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. For example, partition a shape into 4 parts with equal areas and describe the area of each part as $1 / 4$ of the area of the shape.

## First Trimester: Benchmarks

Not assessed in this trimester.

## Second Trimester: Benchmarks

Not assessed in this trimester

## Third Trimester: Benchmarks

| Warning (1) | Unable to partition shapes into parts with equal <br> areas. |
| :--- | :--- |
| Needs Improvement (2) | Requires teacher prompting and support to partition <br> shapes into parts with equal areas. |
| Proficient (3) | Independently partitions shapes into parts with <br> equal areas and expresses each part as a unit <br> fraction of the whole. |
| Advanced (4) |  |
